Mind♥♥♥♥. Wow, this went places both literally and figuratively. Especially the latter part. I guess I teared up a little at the end... It was well worth the read, and I'm looking forward to more, as always.

Highly recommended!. Ok folks lets get to it. I played this game like ♥♥♥♥ing years ago. and I came back to it to see if something is new. Haven't checked it out yet but from the reviews recently it still seems to be a dead game even though it is amazing and very fun to play. I bet you they're gonna shut down soon because no one plays it.. :/ 10/10 if you're going to play for about 30 hours only with your friends.. I spent twenty minutes just tring to get through the first level. I drew a boat just fine and the character aske for an oar. It recognized the "oar" I drew as everything but that.. The game is dead stay well away from this game.

The dev is just a cash n grab

Sadly this game refuses to work on my Computer, so I'll have to give a negative review.. This is a stylish, enjoyable game. Challenging enough but still casual war gaming. Plus I enjoy using the editor to make "what if" situations.. I've put about 16 hours into this addictive twin stick shooter and I don't think I've ever had one grip me in the same way. There are 4 kinds of level, asteroids, enemies, alien encounter and warship.

Asteroid levels start off as all out destruction where your goal is to collect as much scrap as you can so you upgrade before the next level. The whole game has a really nice incline that you don't notice till you realise you've become a total ninja pilot.

It's hugely satisfying to play and outside of a few rare random levels that start in really nasty ways, it's extremely fair and you really feel tied to the ship. turboing through a channel you have cut through asteroids so you don't get pancaked, you feel in control and things happen like they should, there's tons of different enemies with different types of attacks that keep things interesting and it's procedural, so you aren't playing the same arenas over and over.

Great music. Cool upgrades to buy between levels and permanent checkpoints. It just does a lot of things really well and if you are remotely interested in twin stick arena shooters you can't go wrong. It is well worth the very small full price and absolute robbery on sale.. Needs nudity, but the girl with glass's school uniform is pantyless, which is awesome!

Easy game if you like guitar hero. My brain actually learned some new tricks with the one, simple mini game.

Needs nude mode for private dance. WTF, but otherwise worth a buck...or two. Side note: The girls are too girly. Make some women next time. Like Chun-li..... Mmmmmm. Chun i and Camy dance. Xmas is saved. The textbook example of a shallow flash game. Do not be fooled by the premise pitched to you on the store page, this is a very simple AFK game with one best way to play soon made clear. The majority of your time will be spent wishing you could do something about the disgusting elevator pathing, followed by waiting, followed by more waiting and finally learning that you can use in-game cheat codes to rapidly cap the rest of the waiting based achievements before banishing this one from your backlog. It is not worth the asking price, it is not worth an on sale price, it is not worth more than your initial load and mess around session.

Please remember that your time has a value and that value is typically more than a few dollars an hour.. The game is for the smart people!

<https://www.youtube.com/watch?v=aT18eSSI56E>. SUPERHOT is the most innovative shooter I've played in years!. Interesting PvP & Team-Based game.

- 5 hours of gameplay convinced me to buy it (played on Free Weekend)

- 7 euro definitely worth it

- 0 bugs encountered so far

I think any Dead by Daylight lover will embrace this game.. One of best locos in the TS
